Stand: July 2023

## Allgemeines:

The Latin American University of Science and Technology (ULACIT) is not only the #1 private university of Costa Rica, but is also very proud of their innovative and unique educational systems targeted at future entrepreneurs and leadership positions. The university does not give traditional exams, but rather focuses on research projects, case studies and presentation for evaluation to encourage independent studies in students. International students are able to study together with locals in a completely English-taught environment. Studying at this reputable university in a tropical place will be the experience of a lifetime for everyone
