

Studium am

Ming Chi University of Technology

New Taipei City, Taiwan

Stand: November 2024

Allgemeines:

Since its establishment in 1963, Ming Chi has consistently adhered to the philosophy of sophisticated school administration and practice-oriented education. Both academically and practically, the teachers and students here demonstrate rich diversity and energy. We make every effort to cultivate our students to meet the needs of industry and make substantial contributions to our nation in various areas. Teachers and students at Ming Chi always take global and social issues as our own personal duty. Consequently, in addition to continuing our excellent traditions, we also strive to increase our contribution to research and development. Our aim is to build an international learning environment and conduct international collaborative research. In this global village, we train students to gain an international perspective; they will actively confront the challenges brought about by globalization and actively bring their positive attitudes to social participation
