NAMIBIA
UNIVERSITY
OF SCIENCE AND
TECHNOLOGY

Stand: Oktober 2022

Allgemeines:

Higher education in Namibia started around 1979/80. Prior to this, all students wishing to pursue higher education had to study abroad or through distance education. The Namibia University of Science and Technology, a public university, has its roots in the establishment of the Academy for Tertiary Education (Act No. 13 of 1980). The University is ranked as the best higher education institution in Namibia, since 2002 (PMR Africa) and most innovative institution /or organization in Namibia (PMR africa 2014 and 2016), and has won numerous local and international awards. The internationalization agenda is premised on mutually sharing, exchanging, and learning from international best practices, and integration of best international practices into the teaching, learning, research and services of the Namibia University of Science and Technology (NUST). The expected output of internationalization at NUST is to contribute to producing graduates with the requisite knowledge, skills, values and attitudes, and who are able to function effectively in culturally diverse and global competitive context.
